CREATIVE PRODUCTION MANAGEMENT

With over five years of experience in creative production, primarily as an animator in both team and solo settings, I've developed strong proficiency in managing detail-oriented processes and ensuring quality outcomes. My work spans creative production and client management, sharpening my organizational skills for tasks requiring precision and patience. Having focused on the artistic side of production, I am now seeking to broaden my experience in the administrative and operational aspects of the creative process. I bring a calm, thoughtful approach to problem-solving, thriving in detailed work, helping resolve uncertainties and alleviating tasks. My collaborative nature enables me to support projects effectively, ensuring clear, organized workflows that contribute to a unified vision and successful results.
